Spanish and English

### Profile

I'm leading business and digital transformation projects aiming to create value to the market, people, and community. Applying 20+ years of experience to Business-IT challenges from strategy, finance, and operations.

### Experience

2020 - 2022

**IT Manager • Bayer de México** • Working as internal consultant for key projects for the Regulatory Science North of Latin America Region. As part of the Research and Development Crop Science division, I implemented a Project Management Office and defined the digital transformation and improving processes approach along with some security guidelines and established the enterprise architecture foundations for the area in conjunction with peers from Mexico, Brazil, and Germany.

2017 - 2020

**Outsourced director • Longhorn Business Services** • Providing project management and IT solutions to clients. Successfully deployed projects (i.e. ERP vendor selection, PMO implementation, Business and IT strategy coaching and training).

2009 - 2017

**Consulting Manager • PwC** • I oversaw the following services in the People & Organization line of business: HR diagnostic tool, for which my team redesigned the service for 15+ clients. Employee Engagement Survey: I developed the methodology for providing this service in Mexico. Salary Survey: I adapted the PwC UK methodology to be applied to the Mexican data market. In the consulting division, I participated projects as project manager, business analyst, IT security specialist, and program coordinator.

1998 -2009

**IT Consultant Actuarial Services • Willis Towers Watson** • I started as IT technical in charge of providing support for the key systems and communications infrastructure of the company in Mexico (Watson Wyatt). In two years, I became the IT consultant in charge of helping clients with their pension plan implementations, record keeping. I developed a platform for managing flex benefits client's plans among other solutions for improving client facing processes.
