PROFESSIONAL EXPERIENCE

10/2019 – 03/2021
Chicago, IL

Sr. Business Analyst – Finance Data Systems
Univar Solutions
- Acted as global SAP BPC system administrator responsible for enhancing SAP data cube functionality, governing user access and logic script packages
- Ensured proper scheduling and execution of several critical, time-sensitive background processes in step with monthly financial reporting cadence
- Reconciled data imported to BPC system with upstream systems for monthly, quarterly, and annual financial close processes

06/2017 – 09/2019
Chicago, IL

Sr. Supply Chain Analyst
Univar Solutions
- Built, re-engineered, and documented high-visibility supply chain data processes, increasing efficiency and output accuracy
- Stratified 60,000+ legacy system SKUs by demand and margin to determine new SS levels, resulting in estimated SS reduction of ~$1M with no decrease in estimated service levels
- Led a project to build an executive-level suite of transportation cost analysis dashboard tools. Aligned Transportation and Commercial teams to successfully Design, Develop, Test, and Deploy. Received awards of recognition from both Commercial and Transportation team leads

06/2015 – 04/2017
West Lafayette, IN

Graduate Assistant – Program Management
Purdue University, Krannert School of Management
- Served as Program Manager for university's Leadership Communication Studio and drove program growth by over 100% year over year
- Promoted to half-time assistant after 1st year of tenure

04/2013 – 03/2015
Parsippany, NJ

Sr. Software Engineer – Pega CBA 6.1 and CSA 6.2 Certified
Virtusa Corporation
- Worked as part of development team building a large-scale insurance claim processing application on the Pega platform
- Communicated design specifications from onsite client teams to off-shore technical teams to guide software development efforts
- Managed continuous (agile) daily code deployments to ensure new code and defect fixes were pushed to the correct environments at the right time
- Assisted senior developers in the creation of new application functionalities, UI enhancements, and defect fixes
